NITDA Co-Create 2024 Agenda

W e l c o m e

On behalf of the entire GAGE Awards exhibition team, it is my great pleasure to welcome all our guests, visitors and highly esteemed exhibitors to NITDA CO-CREATE West Africa Tech Exhibition 2024.

This year's event is themed "Evolve" and incidentally we have since evolved from just Co-Create Africa to an exciting partnership with NITDA with a promise to create a platform that will not only spotlight the best of innovations, but also ensure the digital transformation message resonates with every Nigerian. The NITDA CO-CREATE West Africa Tech Exhibition promises to be an exciting time.

We have brought together innovators, thought leaders and industry experts from Nigeria and beyond, under one roof, to explore advancements in technology and innovation with a peep into the minds of the drivers of local tech solutions to the complex problems that exist in our environment. We are happy to have you join us.

The exhibition is supported by a 2-day conference session covering over 11 content tracks. It provides a unique opportunity for collaborations, knowledge sharing and networking while showcasing your innovative products and services to a diverse audience.

You will have the opportunity to engage in interactive sessions, panel discussions, workshops and networking sessions all designed to inspire creativity, foster collaborations and drive innovations in the West Africa tech ecosystem.

We encourage you to take full advantage of everything the exhibition has to offer as we celebrate the spirit of innovation and entrepreneurship in our region. The GAGE Awards will take place on the 2nd of March 2024 to ice the cake of celebrations by spotlighting individuals and brands in the tech space that have excelled in making our lives simpler and better in the past year.

Finally, we would like to thank our exhibitors and speakers for their contribution in making this edition of NITDA CO-CREATE an enormous success. We wish you all fruitful collaborations with valuable outcomes

Johnson Anorh,
Convener, Gage Awards

UTOPIA

Utopia P2P is a pioneering technology company specializing in peer-to-peer (P2P) decentralized communication and secure digital transactions. Founded with a vision to revolutionize the way people interact and transact online, Utopia P2P offers a cutting-edge platform that prioritizes privacy, security, and user autonomy.

ZOHO CORPORATION

We believe that software is the ultimate product of the hands and the mind. And we take pride in creating products and solutions that help solve business problems, anticipate needs, and discover opportunities to help you grow. Over the past 25 years, we've brought more than 55 products to the market. But, the R&D edge that drives this innovation isn't simple luck, it's the result of careful choice. We prefer to build things ourselves instead of growing our platform through acquisition. We invest more in customer support and product development than in sales and marketing. All that because we believe that's the best way to deliver choice and value to our customers. This kind of thinking isn't innovative. But in today's business climate, it is increasingly rare.
